

## Build a Welcome Action (2)

1. Build a start button
2. Create a new layer and rename it to 'start'
3. Frame One, go into the library and drag a star button onto the stage
4. Use free transform tool to make it smaller (shift key constrains proportions)
5. Text tool, choose a font, match the color to the star and type "Welcome"
6. Rotate and resize and move as needed with the free transform tool
7. Select both and choose Modify and then convert to symbol
8. Name the symbol "start" and type is Movie, click ok
9. On the camera layer, frame 12, right click and insert Keyframe
10. Between frame 1 and 12, right click and create a classic tween
11. Start Layer, Frame 12, Properties Panel, Color Effect, Style Alpha, set at zero percent so that it fades out at frame 12, Frame one is 100 percent
12. Let's make sure that the text renders correctly
13. Double click the start instance and select the "Welcome" text
14. Menu, modify then break apart twice to create shapes from text
15. Go to Scene 1 which is the root scene for the movie and "control test"
