

## Add Interaction (3)

1. Convert the Quote into shapes.
2. Select the Quote Layer, select the Quote and Modify then break apart twice to create shapes from text.
3. Relock the Quote layer
4. Create a new layer above the Start Layer, Name it Actions and lock it
5. Actions layer is only for Code
6. Unlock Start Layer, select the Star/Welcome and in the properties panel give it an instance name "button" Lock the layer
7. Choose frame one of the Actions Layer
8. Menu, Window, Actions to open the Actions Panel
9. Select the "Add Using Wizard" button
10. Select an Action - "Stop" (This stops the play head)
11. Object to Apply the Action – "This Timeline"
12. Triggering Event – "With This Frame" (stops the play head on frame 1)
13. If you control test, nothing happens yet...Needs an Event Listener
14. Add Event Listener
15. Go back into the Actions panel, click on " Add Using Wizard" button
16. Select and Action – "Play"
17. Object to apply the Action – "This Timeline" then press next
18. Triggering Event – "On Mouse Click"
19. Object for Triggering Event - "Button" then click Finish and Add
20. Control Test to bring up the Animation, Press on the Star
21. Make sure that the animation Stops on the last frame
22. Close out the Actions panel, go to the Last Frame in the Actions Timeline
23. Right click and insert a blank Keyframe
24. Open the Actions Panel....Should be blank
25. Type in "This.Stop" Do not type the Parathesis...
26. Control Test again, everything should work and it stops on the last frame
