

This isn't mission difficult, it's mission impossible. "Difficult" should be a walk in the park for you.

You are uniquely trained and highly motivated - a specialist without equal - immune to any countermeasures. The living manifestation of destiny.

Your mission, should you choose to accept it:

Become a Math Aficionado. You are to infiltrate Doctor Evil's Math Club with a program that you will write and then use to save the world.

As always, should you or any member of your team be caught or killed, we will disavow all knowledge of your actions.

Your mission:

Using Javascript, create a program that will give the factorial number of any number inside of a variable.

We can neither confirm nor deny any details but this was transmitted before we cut all contact. Too many agents have been lost. Failure is not an option!
